

# Business Broadband

Dependable broadband that's hassle-free

## Business Broadband from hSo:

Some broadband can slow down just when needed most. hSo Business Broadband delivers consistent connectivity with 24/7 support too.

hSo Business Broadband can be a cheaper option than leased lines for your smaller office sites or retail premises.

It's also ideal for home-working. If your home-workers are left to make their own arrangements, your IT team faces troubleshooting with multiple suppliers. hSo Business Broadband can remove that hassle.

# Business Broadband

## hSo's Business Broadband key benefits:

### Single provider

Avoid grappling with different hardware and service levels from multiple providers. Let hSo be your single point of contact.

### Full range of options

We offer a range of connectivity options including ADSL, ADSL2+, FTTC, and FTTC2.

### 24/7 support

Our UK-based technicians are on hand, day and night, to help keep everything running smoothly.

### Fit for purpose

hSo Business Broadband can be metered or unmetered. It's backed by SLAs too.

### Fully managed

We give you the option of a managed service, including migration support and proactive monitoring.

### Contractual simplicity

A single provider and a bill covering all your users.

## Additional benefits:

### Remote working experts

We can deliver hSo Business Broadband as part of a wider remote working solution involving VoIP for Homeworking and SSL VPN technology for secure remote access.

### Multiple providers

Unlike some business broadband providers, hSo offers multiple carrier options. We use the likes of Talk Talk Business, as well as BT, to give you more options.

### Flexibility

We can provide you with routers, or you can provide your own.

### 3G or 4G backup options

We can offer mobile broadband as a backup, so you stay connected even if your broadband line develops a fault. This is especially useful for retail businesses that can't risk having any downtime.
